List of Contents

NUMBER 1

Zvi Drezner and George O. Wesolowsky	1	Allocation of demand when cost is demand-dependent
Andreas Frink and Stefan Voß	17	Applications of modern heuristic search methods to pattern sequencing problems
A. Volgenant and E. Teerhuis	35	Improved heuristics for the *n*-job single-machine weighted tardiness problem
***Dirk Biskup* and T. C. Edwin Cheng**	45	*Multiple-machine scheduling with earliness,* tardiness and completion time penalties
***Soung-Hie Kim,* Choong-Gyoo Park and Kyung-Sam Park**	59	*An application of data envelopment analysis in* telephone offices evaluation with partial data
Bin Liu and Jinhua Cao	73	Analysis of a production–inventory system with machine breakdowns and shutdowns

NUMBER 2

Sabine Wittevrongel and Herwig Bruneel	93	Discrete-time queues with correlated arrivals and constant service times
Ching-Fang Liaw	109	A tabu search algorithm for the open shop scheduling problem
Nagraj Balakrishnan, John J. Kanet and 'Sri' V. Sridharan	127	Early/tardy scheduling with sequence dependent setups on uniform parallel machines
Richard L. Daniels, Stella Y. Hua and Scott Webster	143	Heuristics for parallel-machine flexible-resource scheduling problems with unspecified job assignment
V.S. Gordon and V.A. Strusevich	157	Earliness penalties on a single machine subject to precedence constraints: SLK due date assignment
G.H. Chan, Z.H. Xia and E.U. Choo	179	The critical cut-off value approach for dynamic lot sizing problems with time varying cost parameters

NUMBER 3

Dennis Ridley	189	Optimal antithetic weights for lognormal time series forecasting
Haïscam Abdallah, Raymond Marie and Bruno Sericola	211	Point and expected interval availability analysis with stationarity detection
Vinicius A. Armentano and Débora P. Ronconi	219	Tabu search for total tardiness minimization in flowshop scheduling problems
H. M. Wee and W. T. Wang	237	A variable production scheduling policy for deteriorating items with time-varying demand
Gulay Barbarosoglu and Demet Ozgur	255	A tabu search algorithm for the vehicle routing problem
Diptesh Ghosh and Nilotpal Chakravarti	271	A competitive local search heuristic for the subset sum problem
Douglas M. Kline, Abraham Mehrez and Geoffrey Steinberg	281	Information availability vs. solution space size in a knowledge acquisition position

NUMBER 4

THE TRAVELING SALESMAN PROBLEM

Samuel J. Raff	293	Preface
A. Punnen	295	Editorial
Y.P. Aneja and H. Kamoun	297	Scheduling of parts and robot activities in a two machine robotic cell
Gregory Gutin	313	Exponential neighbourhood local search for the traveling salesman problem
Gregory Gutin and Anders Yeo	321	Small diameter neighbourhood graphs for the traveling salesman problem: at most four moves from tour to tour
S.N. Kabadi and Md. Fazle Baki	329	Gilmore-Gomory type traveling salesman problems
Md. Fazle Baki and Santosh N. Kabadi	353	Pyramidal traveling salesman problem

Leyuan Shi, Sigurdur Ólafsson and Ning Sun	371	New parallel randomized algorithms for the traveling salesman problem
Samerkae Somhom, Abdolhamid Modares and Takao Enkawa	395	Competition-based neural network for the multiple travelling salesman problem with minmax objective
Edo S. van der Poort, Marek Libura, Gerard Sierksma and Jack A.A. van der Veen	409	Solving the *k*-best traveling salesman problem
Steven E. Butt and David M. Ryan	427	An optimal solution procedure for the multiple tour maximum collection problem using column generation

NUMBER 5

Paul Mangiameli and David West	443	An improved neural classification network for the two-group problem
Chu-Fu Wang, Bo-Rong Lai and Rong-Hong Jan	461	Optimum multicast of multimedia streams
James M. Varanelli and James P. Cohoon	481	A fast method for generalized starting temperature determination in homogeneous two-stage simulated annealing systems
Jae-Dong Hong and Jack C. Hayya	505	On integrated production-replenishment policies in single-stage manufacturing
Oded Berman and U. Dinesh Kumar	525	Optimization models for complex recovery block schemes

NUMBER 6

Hui-Ming Wee and Sh-Tyan Law	545	Economic production lot size for deteriorating items taking account of the time-value of money
H.W. Lee, S.H. Lee, S.H. Yoon, B.Y. Ahn and N.I. Park	559	A recursive method for Bernoulli arrival queues and its application to partial buffer sharing in ATM
Faruk Güder and James L. Zydiak	583	Ordering policies for multi-item inventory systems subject to multiple resource constraints

Shaw-Ping Lan, Peter Chu, Kun-Jen Chung, Wun-Jung Wan and Ricky Lo	599	A simple method to locate the optimal solution of the inventory model with variable lead time
Tamie L. Veith, John E. Kobza and C. Patrick Koelling	607	Netsim: Java™-based simulation for the World Wide Web
Ralf Östermark	623	Solving a nonlinear non-convex trim loss problem with a genetic hybrid algorithm
Noel (Kweku-Muata) Bryson and Anito Joseph	637	Generating consensus priority point vectors: a logarithmic goal programming approach

NUMBER 7

Ji-Hui Zhang and Xin-He Xu	645	An efficient evolutionary programming algorithm
Tai-Yue Wang and Kuei-Bin Wu	665	A parameter set design procedure for the simulated annealing algorithm under the computational time constraint
Ching-Fang Liaw	679	A branch-and-bound algorithm for the single machine earliness and tardiness scheduling problem
Bertrand M.T. Lin	695	The strong NP-hardness of two-stage flowshop scheduling with a common second-stage machine
Michel Gendreau, Gilbert Laporte and Daniele Vigo	699	Heuristics for the traveling salesman problem with pickup and delivery
T.C. Edwin Cheng, Guoqing Wang and Chelliah Sriskandarajah	715	One-operator-two-machine flowshop scheduling with setup and dismounting times
Waldemar Czuchra	731	Optimizing budget spendings for software implementation and testing

NUMBER 8

T.C.E. Cheng and Q. Ding	749	The time dependent machine makespan problem is strongly NP-complete
Soung Hie Kim and Chang Hee Han	755	An interactive procedure for multi-attribute group decision making with incomplete information

Funda Sivrikaya-Şerifoğlu and Gündüz Ulusoy	773	Parallel machine scheduling with earliness and tardiness penalties
J.M. Coutinho-Rodrigues, J.C.N. Clímaco and J.R. Current	789	An interactive bi-objective shortest path approach: searching for unsupported non-dominated solutions
Shouhong Wang	799	Nonlinear regression: a hybrid model
W.L. Pearn and J.B. Chou	819	Improved solutions for the Chinese postman problem on mixed networks
A. Kimms	829	A genetic algorithm for multi-level, multi-machine lot sizing and scheduling

NUMBER 9

Emanuel Melachrinoudis and Frank GuangSheng Zhang	849	An $O(mn)$ algorithm for the 1-maximin problem on a network
Peter M. Vanden Bosch, Dennis C. Dietz and Edward A. Pohl	871	Choosing the best approach to matrix exponentiation
Toshitsugu Otake, K. Jo Min and Cheng-Kang Chen	883	Inventory and investment in setup operations under return on investment maximization
Won Jun Lee and Kun Chang Lee	901	PROMISE: a distributed DSS approach to coordinating production and marketing decisions
Erik Rolland, Ali Amiri and Reza Barkhi	921	Queueing delay guarantees in bandwidth packing

NUMBERS 10–11

AGGREGATION AND DISAGGREGATION IN OPERATIONS RESEARCH

Samuel J. Raff	937	Preface
David F. Rogers	939	Foreword
Mathematical Programming & Networks		
H. Edwin Romeijn and Robert L. Smith	941	Parallel algorithms for solving aggregated shortest-path problems

Kurt Jørnsten, Rainer Leisten and Sverre Storøy	955	Convergence aspects of adaptive clustering in variable aggregation
Igor S. Litvinchev and Socorro Rangel	967	Localization of the optimal solution and a posteriori bounds for aggregation
Chiun-Ming Liu	989	Clustering techniques for stock location and order-picking in a distribution center
Susan K. Norman, David F. Rogers and Martin S. Levy	1003	Error bound comparisons for aggregation/disaggregation techniques applied to the transportation problem
Production Planning & Scheduling		
Jishnu Hazra, Paul J. Schweitzer and Abraham Seidmann	1015	Analyzing closed Kanban-controlled assembly systems by iterative aggregation–disaggregation
Rajesh Tyagi and Chandrasekhar Das	1041	Grouping customers for better allocation of resources to serve correlated demands
Larry Weinstein and Chen-Hua Chung	1059	Integrating maintenance and production decisions in a hierarchical production planning environment
Location Analysis		
Erhan Erkut and Burçin Bozkaya	1075	Analysis of aggregation errors for the *p*-median problem
Robert L. Bowerman, Paul H. Calamai and G. Brent Hall	1097	The demand partitioning method for reducing aggregation errors in *p*-median problems
M. Brenda Rayco, Richard L. Francis and Arie Tamir	1113	A *p*-center grid-positioning aggregation procedure
Markov Chains		
Moshe Haviv	1125	On censored Markov chains, best augmentations and aggregation/disaggregation procedures
Forecasting		
Gene Fliedner	1133	An investigation of aggregate variable time series forecast strategies with specific subaggregate time series statistical correlation
	1151	List of Referees

NUMBER 12

Michel Gendreau, Gilbert Laporte, Christophe Musaraganyi and Éric D. Taillard	1153	A tabu search heuristic for the heterogeneous fleet vehicle routing problem
Ching-Chir Shyur, Ta-Chien Lu and Ue-Pyng Wen	1175	Applying tabu search to spare capacity planning for network restoration
Ruben Kirkeby Martinson and Jørgen Tind	1195	An interior point method in Dantzig–Wolfe decomposition
Manuel Laguna, Rafael Marti and Vicente Campos	1217	Intensification and diversification with elite tabu search solutions for the linear ordering problem
Gary R. Reeves and Randall C. Reid	1231	A military reserve manpower planning model

NUMBER 13

Edward M. Condon, Bruce L. Golden and Edward A. Wasil	1243	Predicting the success of nations at the Summer Olympics using neural networks
Ayse Kavusturucu and Surendra M. Gupta	1267	Expansion method for the throughput analysis of open finite manufacturing/queueing networks with N-policy
Wei-Chang Yeh	1293	A new branch-and-bound approach for the $n/2/\text{flowshop}/\alpha F+\beta C_{\max}$ flowshop scheduling problem
Gary R. Reeves and Kenneth R. MacLeod	1311	Some experiments in Tchebycheff-based approaches for interactive multiple objective decision making
David J. Robb and Dan Trietsch	1323	Maximizing the number of mixed packages subject to variety constraints

NUMBER 14

LOCATION SCIENCE

Zvi Drezner and George O. *Wesolowsky*	1335	Allocation of discrete demand with changing *costs*

Stefano Benati	1351	The maximum capture problem with heterogeneous customers
Maureen Kilkenny and Jacques-François Thisse	1369	Economics of location: A selective survey
Igor Averbakh and Oded Berman	1395	Algorithms for path medi-centers of a tree
Mihiro Sasaki, Atsuo Suzuki and Zvi Drezner	1411	On the selection of hub airports for an airline hub-and-spoke system
Mamnoon Jamil, Alok Baveja and Rajan Batta	1423	The stochastic queue center problem
